

# The BAC 360™ Spray Nozzle

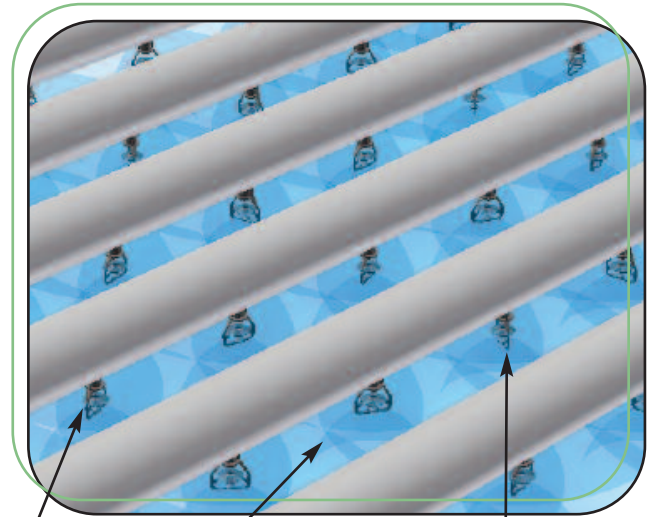

*Product Report*

## Standard on BAC Coil Products:

**FXV, VFL, VF1, CXV, CXV-T, VC1, VCA, and VCL**

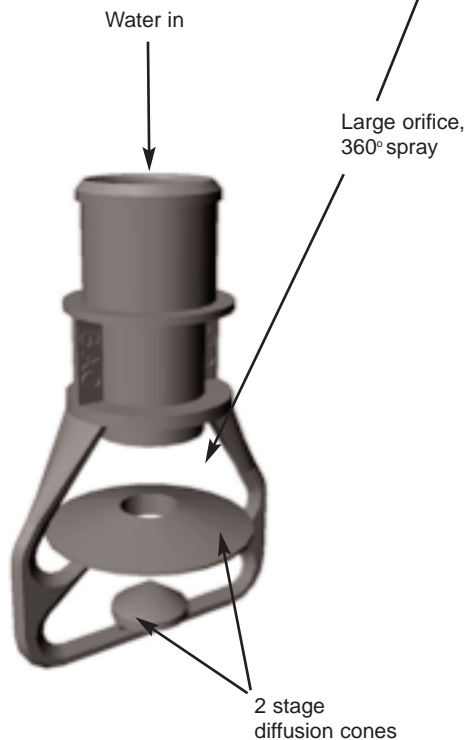

Reduce maintenance costs and ensure efficient equipment operation with BAC's latest non-clog nozzle that combines scatter diffusion technology with BAC's largest nozzle orifice yet, to create the most technologically advanced spray nozzle in the industry!

The nozzles are designed in concert with BAC spray distribution systems to optimize the performance of your BAC equipment. These nozzles are an easy retrofit for many units from other manufacturers too! Contact BAC for competitive cross reference assistance.

Spray patterns overlap, eliminating dry spots on the coils

No alignment needed

## Features and Benefits

- Ease of Maintenance
  - Easy snap in/out grommet design
  - Large non-clog orifice
- Robust, durable construction
- Universal alignment
- Anti-scale design
- No moving parts
- Eliminates dry spots inherent in other designs
